

ZHICO PRADITA

Cybersecurity Analyst | Penetration Tester | Full Stack Developer

Lampung, Indonesia | zhicoapta123@gmail.com | +62 823-5203-1324 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Informatics Engineering student at Institut Teknologi Sumatera (ITERA) specializing in cybersecurity, with hands-on experience in penetration testing, SOC monitoring, and bug bounty hunting. Skilled in SIEM log analysis using Wazuh, web application exploitation, and incident response following the OWASP methodology and MITRE ATT&CK framework. Founder of Maylene.code, a cybersecurity and programming education platform. Combines an offensive security mindset with full stack development experience to build and defend secure systems.

SKILLS

- Offensive Security: Penetration Testing, Vulnerability Assessment, Reconnaissance and OSINT, Web Application Exploitation, Red Teaming
- Defensive Security: Log Monitoring and Analysis, Network Security, Incident Response, SIEM (Wazuh)
- Investigation and Analysis: Email Investigation, Phishing Analysis, Malware Analysis
- Tools: Nmap, Burp Suite, Hydra, WhatWeb, Feroxbuster, FFUF, Sysmon, VirusTotal API, ReportLab
- Development: Python, Next.js, React, TypeScript, Prisma ORM, PostgreSQL, FastAPI, NextAuth
- Frameworks and Standards: OWASP Testing Guide, MITRE ATT&CK, CVSS 3.1

PROFESSIONAL EXPERIENCE

CEO and Founder *July 2026 - Present*

Maylene.code

- Founded and lead an educational platform combining cybersecurity and multi language programming courses.
- Defined platform architecture and curriculum covering penetration testing and software engineering learning paths.

Freelance Full Stack Developer *August 2026*

SKY HAUS

- Led end to end development and deployment of a cloud based Point of Sale and management system for a retail cafe business using Next.js, React, TypeScript, Prisma ORM, PostgreSQL, and NextAuth.
- Collaborated directly with the client to translate requirements into a secure role based platform separating Admin and Cashier operations.
- Implemented real time cart management, Bluetooth thermal printer integration, automated financial analytics, and transaction voiding with automated stock restoration.

SOC Analyst *May 2026 - June 2026*

Zivratech

- Built a full Security Operations Center homelab using Wazuh 4.7.5 as SIEM across an Ubuntu server, a Windows 10 endpoint with Sysmon, and a Parrot OS attacker machine.
- Simulated real world attacks including Nmap scanning, Hydra brute force, and registry and firewall tampering to test detection capability.
- Documented findings in a formal incident report (INC-2026-001) with MITRE ATT&CK mapping.

Incident Responder *May 2026 - June 2026*

Zivratech

- Developed a custom phishing email analysis tool (email_analyzer.py) integrated with the VirusTotal API for automated risk scoring.
- Conducted incident response for a phishing attack (INC-2026-002), performing email header analysis and indicator of compromise identification.
- Produced a professional PDF report generated via ReportLab including MITRE ATT&CK mapping and evidence screenshots.

Freelance Penetration Tester *July 2026*

Cafe'in

- Performed black box penetration testing on a web application, identifying critical authentication vulnerabilities through source code review and manual exploitation.

Freelance Penetration Tester*July 2026*

RuangWarta

- Conducted black box penetration testing on a news portal web application following the OWASP Testing Guide, covering reconnaissance, scanning, vulnerability mapping, and manual exploitation.
- Discovered a critical hardcoded credential vulnerability in a public client side JavaScript file rated CVSS 3.1 score 9.8, resulting in full compromise of the administration panel.
- Delivered a professional report including executive summary, proof of concept, CVSS scoring, and technical remediation recommendations.

Freelance Penetration Tester*January 2026*

BudiShop

- Provided freelance security consulting including black box penetration testing and vulnerability reporting for client web applications following OWASP methodology.

Head of Development Division*July 2023 - July 2025*

Scout Movement (Gerakan Pramuka)

- Led the development division, designing training programs and leadership regeneration strategies to support long term organizational growth.

BUG BOUNTY AND SECURITY RESEARCH

- Conducted authorized bug bounty research on NASA Vulnerability Disclosure Program via Bugcrowd, including IDOR testing, session exposure analysis, broken link hijacking, and custom phpBB endpoint analysis on TOLNet API endpoints and the Earthdata forum.
- Performed security research on Mint Mobile and Twilio programs via HackerOne.
- Co-discovered and reported an IDOR/BOLA vulnerability on ITERA's SIAKAD academic system, rated CVSS 6.5.

SELECTED PROJECTS

- SOC - Wazuh SIEM Implementation: end to end SOC homelab with simulated attacks and formal incident reporting mapped to MITRE ATT&CK.
- Phishing Incident Response: automated phishing analysis tool with VirusTotal API integration and professional incident report.
- SKY HAUS Point of Sale: full stack retail POS application with role based access control and hardware integration.
- Black Box Penetration Test on RuangWarta News Portal: identified a critical credential exposure vulnerability with CVSS 9.8.
- OSINT and Reconnaissance Dashboard: FastAPI and Next.js based tool suite covering subdomain enumeration, port scanning, DNS analysis, and vulnerability scanning.

EDUCATION

Bachelor of Informatics Engineering*July 2022 - Present*

Institut Teknologi Sumatera (ITERA), Lampung Selatan, Lampung | GPA 3.04 / 4.00

High School Graduate*July 2022 - May 2025*

SMA Negeri 1 Gunung Agung, Tulang Bawang Barat, Lampung | GPA 85.45 / 100

CERTIFICATIONS

- Google Cybersecurity Certificate, issued June 2026
- ISC2 Cybersecurity Certificate, issued February 2026, expires February 2029
- Certified Junior Web Application Penetration Tester, issued March 2026
- Mastercard Cybersecurity Job Simulation (Forage), issued April 2026
- Vulnerability Report and Responsible Disclosure Appreciation, issued May 2026
- GRC Fundamentals, issued July 2026
- Gemini Certified Educator, issued July 2026
- GUNA Cybersecurity Certificate, issued August 2026

AWARD

- Cumlaude WEB3, issued May 2026
